

LUBRAL COTTON PICKER

COTTON PICKERS GREASE

DESCRIPTION

NLGI 00 grade grease, made from lithium hydroxy stearate and additives that give it adequate performance against wear, corrosion and oxidation of cotton harvesting machinery, among other equipment.

BENEFITS

- Protection against wear.
- Avoids rust and corrosion.
- Adequate pumpability.
- Good mechanical stability.

APPLICATIONS

It is recommended to lubricate cotton picker machinery and machinery or equipment mechanisms that require a fluid grease with characteristics against wear and corrosion.

CHARACTERISTICS

TESTS	TEST METHOD	TYPICAL VALUE
NLGI Grade	ASTM D217	00
Thickener	ASTM D128	Lithium
Color	Visual	Green
Texture	Visual	Smooth
Worked penetration @ 60 strokes 1/10 mm	ASTM D217	403
Dropping point, °C	ASTM D2265	186
Water washout @ 80°C, % weight loss, max.	ASTM D1264	10
Leakage tendencies, % max.	ASTM D1263	10
4 balls wear, mm	ASTM D4172	0.6

Typical Characteristics are those obtained with normal tolerance of production and no constitute a specification. Variations, that do not affect the yield product during the normal manufacturing and on different mixing locations are expected.

Information contained in this document is held to changes without previous advisement. The availability of the products could vary depending on the location. For further information, contact venta@lubral.com.
